Support

In order to get support during the Capstone journey you could resort to the following two options.

1. We shall have new group channels on slack on the basis of your project selection. Your mentors shall be added there as well. You could engage in discussions with your peers and mentors to get insights and help regarding your work.
2. Please refer the FAQ's shared in the respective capstone for any queries. For any other assistance, our academics team shall guide you as in when you need them. You could raise support tickets through Olympus to seek their assistance.

Please reach out to the Program Office through email in case you require any further assistance.
